Pre-Disaster Mitigation
Water Quality
All States
FEMA
Federal
This goal of the FSM program is to reduce overall risk to the population and structures, at the same time reducing reliance on federal funding through Stafford Act disaster assistance. FSM will select eligible projects and plan sub-applications that will form a basis for future FSM program funding. Funding will be released through a series of pre-disaster funding available through the Innovation Mitigation Program (IMP). As directed by the Congressional appropriations language, FSM will use the majority of the IMP funding for mitigation projects.

Application Status Deadline: Eligibility

State, local, and tribal governments.

Level of Assistance

$235.2 million is available for FY19 FSM grants. FEMA will provide allocations to states and territories which fully satisfied requirements and will set aside $15 million for territories.

Flood Mitigation Assistance
Water Quality
All States
FEMA
Federal
The Flood Mitigation Assistance (FMA) Program makes available Federal funds to State, Local and Tribal Governments to reduce or eliminate the risk of federally declared flood damage and to structures under the National Flood Insurance Program (NPIP). This program addresses one of the five mission areas of DHS, as specified in the Quadrennial Homeland Security Review: Preparedness. Pre-disaster Mitigation focuses on reducing community vulnerability by improving community planning, infrastructure, and the community's ability to withstand and recover from floods.

Application Status Deadline: Eligibility

Local governments, including cities, towns, counties, special districts, and Native American Tribal Organizations.

Level of Assistance

The maximum federal share for FSM planning sub-applications is as follows: up to $125 per capita for community flood mitigation action assistance. Up to $10,000 per community for noncompetitive mitigation projects $10,000 for the states of Alabama, Alaska, Arizona, Delaware, Hawaii, Idaho, Maryland, Mississippi, Montana, New Mexico, Nevada, North Dakota, Oklahoma, Oregon, South Carolina, South Dakota, Utah, Virginia, Washington, West Virginia, Wyoming.

Green Partners (Commercial Sector Recycling)
Environmental & Education
MN
Hennepin County
Non-Federal
The commercial sector generates more than half of the total waste in Hennepin County. Many of the waste streams created by companies and non-profits are recyclable. Having a strong recycling program conserves natural resources and reduces greenhouse gas emissions, can help your bottom line, and demonstrates your organization's commitment to sustainability and the community.

Application Status Deadline: Eligibility

Up to $100,000 for community flood mitigation assistance • Up to $10,000,000 for community flood mitigation projects.

Level of Assistance

Must be used to improve your organization's recycling program on facilities located in Hennepin County.

Source Water Protection: Competitive Grant Program
Groundwater
MN
Dept of Health
Non-Federal
Program to support source water protection for community and nontransient non-potable water systems. Source water protection activities that are funded under this grant program must focus on minimizing or eliminating one or more potential sources of contamination that the Minnesota Department of Health has determined present a risk to the public water system.

Application Status Deadline: Eligibility

A public water supplier must meet the following conditions in order to qualify for a grant: 1) be a community or a non-transient non- potable water supplier, and 2) the water supplier is not currently subject to administrative penalty action by the MN Dept of Health for violation of state or federal public water supply regulations.

Level of Assistance

The total amount of funding that is available under the competitive program is $75,000. An equal cost share for matching funds is required for receiving a grant. Minimum grant amount of $15,000. Maximum grant award is $30,000.

Capital Region Watershed District (CRWD) Water Quality Capital Improvement Grants
Water Quality
MN
Capital Region Watershed District (CRWD)
Non-Federal
Capital Region Watershed District (CRWD) Water Quality Capital Improvement Grants provide financial assistance for flood engineering and construction of storm-water quality and/or effectiveness projects. Successful applications have a minimum of a 1:1 match. CRWD plans to allocate the funds within a construction year-in-progress. Applicant matching funds are not required, but encouraged. The goals of CRWD's source water protection are focused on projects that reduce or eliminate one or more potential sources of contamination that the Minnesota Department of Health has determined present a risk to the public water system.

Application Status Deadline: Eligibility

The construction and implementation of construction management expenses must exceed $600,000. The Minnesota Department of Health encourages applications that are not currently subject to administrative penalty action. Minimum grant amount is $500. Maximum grant award is $300,000. Source water protection activities under this program must focus on minimizing or eliminating one or more potential sources of contamination that the Minnesota Department of Health has determined present a risk to the public water system.

Level of Assistance

The construction and implementation of construction management expenses must exceed $600,000. The Minnesota Department of Health encourages applications that are not currently subject to administrative penalty action. Minimum grant amount is $500. Maximum grant award is $300,000. Environmental Response Fund
Brownfields
MN
Hennepin County
Non-Federal
Environmental Response Fund (ERF) grants are available to fund the assessment and cleanup of contamination at sites where conditions prevent them from being used as a part of the environment. Brownfield sites are defined as real property, the expansion or redevelopment of which may be complicated by the presence or potential presence of hazardous substances, pollutants or contaminants.

Application Status Deadline: Eligibility

Source water protection activities under this program must focus on minimizing or eliminating one or more potential sources of contamination that the Minnesota Department of Health has determined present a risk to the public water system.

Level of Assistance

The construction and implementation of construction management expenses must exceed $600,000. The Minnesota Department of Health encourages applications that are not currently subject to administrative penalty action. Minimum grant amount is $500. Maximum grant award is $300,000. Source water protection activities under this program must focus on minimizing or eliminating one or more potential sources of contamination that the Minnesota Department of Health has determined present a risk to the public water system.

Natural Resources Grants - Good Steward Grant
Water Quality
MN
Hennepin County
Non-Federal
Projects for eligible projects that improve water quality, enhance natural areas and promote environmental stewardship to the community. Ideal for enhanced community-based or single applicant projects. Typical projects include constructing storm-water basins, installing stream banks, restoring native vegetation, improving the distribution and quality of drinking water supply. Typical projects include installing vegetated filter strips and other best management practices. Eligible applications include environmental or engineering consulting fees, materials, supplies, labor and inspection fees.

Application Status Deadline: Eligibility

The following entities in Hennepin County: individual landowners, nonprofit, and non-governmental organizations, businesses or other private property owners who are located within CRWD Watershed District (CRWD) are eligible.

Level of Assistance

Up to $30,000. Typical award of $5,000 to $15,000. Grant shall not exceed 70% of the total eligible project cost. Community grant contribution can be cash or in-kind contribution.

| Program goal is to restore or enhance wetlands, forests, buffer strips for fish, game, or wildlife in Minnesota. Program provides competitive grants of $500,000-$400,000 with a 10% non-state match requirement and a total project cost cap of $675,000. Restoration and enhancement projects will only be funded on lands in public ownership or waters designated as public waters. All project sites must be located within the 7 county metro area or within city limits of cities with a population of 50,000 or greater (Duluth, Rochester, St. Cloud). Private individuals and for-profit organizations are not eligible to apply for these grants. |}
