## 2. LOCAL GOVERNMENT UNIT DECISION

Date of Decision: <b>10/11/2017</b>		
<input checked="" type="checkbox"/> Approved Denied	<input type="checkbox"/> Approved with conditions (include below)	<input type="checkbox"/>

LGU Findings and Conclusions (attach additional sheets as necessary):

The proposed project would consist of removing deposited sediments and vegetation from the bottom and side slopes of the drainage swale located along the south side of Old Rockford Road between 4385 Lawndale Lane North and 17805 Old Rockford Road in Plymouth, MN. The vegetation in the ditch bottom includes volunteer willow trees and cattails, no trees on private property are proposed to be removed with this project. The sediment excavation area is 1 feet deep by 5 feet wide by 465 feet long and is estimated to be 86 cubic yards of material removed.

The applicant has requested a decision on the applicability of a no-loss, per WCA 8420.0415 (E) "Excavation limited to removal of deposited sediment in wetlands that are presently utilized as storm water management basins, or excavation and removal of contaminated substrate, when the excavated area is limited to the minimum dimensions necessary for achieving the desired purpose and stabilized to prevent water quality degradation."
