LGU Findings and Conclusions (attach additional sheets as necessary):

<p>Jacobson Environmental investigated the 3300 Plymouth Blvd. site on September 29, 2016 for the presence and extent of wetland. Two wetlands were identified on-site. Wetland 1 is a Type 5, PUBGx, storm water pond dominated by reed canary grass, cattail, and duckweed. Wetland 2 is a Type 2/3/7 PEMCd/PF01B, wet meadow/shallow marsh/wooded swamp wetland dominated by reed canary grass, willow, box elder, American elm, and cattail.</p> <p>Due to the time of year, it is difficult to make an approval for wetland boundary and type. On December 16th, 2016 Wayne Jacobson waived the 60 day decision requirement. The wetland boundaries and types are approved conditionally and a spring site visit is required for final approval.</p>
