Summary and description of proposed project (attach additional sheets as necessary):

<p>The City of Golden Valley is proposing to excavate ML-2 and ML-3, two city-owned stormwater ponds to remove sediment. Work is expected to begin in December 2018 and finish in Spring 2019.</p> <p>The City of Golden Valley applied for a No-Loss decision under the excavation of deposited sediment in wetlands used as stormwater ponds does not require replacement. Sediment sampling was completed in 2018 and found accumulated sediment within both pond including contaminated sediment in ML-3. The accumulated sediment has caused both ponds to be shallower than their managed depths. Sediment will be excavated in each pond to return the ponds to their managed depths. Excavated sediment will be deposited in upland areas.</p>
